

## **BRAIN AND NERVOUS SYSTEM**

Acute generalised paralysis, including polio and guillain-barre

Basal ganglia, extra-pyramidal disorders; other dystonias nos

Benign and malignant brain tumours, treatable

Compound/ depressed fractures of skull

Difficulty in breathing, eating, swallowing, bowel, or bladder control due to non-progressive neurological (including spinal) condition or injury

Encephalocele; congenital hydrocephalus

Epilepsy (status epilepticus, initial diagnosis, candidate for neurosurgery)

Intraspinal and intracranial abscess

Meningitis - acute and subacute

Myasthenia gravis; muscular dystrophy; neuro-myopathies nos

Peripheral nerve injury with open wound

Reversible CNS abnormalities due to other systemic disease

Severe/Moderate head injury: Hematoma/Edema with loss of consciousness

Spina bifida

Spinal cord compression, ischaemia or degenerative disease nos

Stroke-due to haemorrhage, or ischaemia

Subarachnoid and intracranial hemorrhage/hematoma; compression of brain

Tetanus

Transient cerebral ischemia; Life-threatening cerebrovascular conditions nos

Vertebral dislocations/fractures, open or closed with injury to spinal cord

Viral meningitis, encephalitis, myelitis and encephalomyelitis

## **EYE**

Acute orbital cellulitis

Angle-closure glaucoma

Bell's palsy; exposure keratoconjunctivitis

Cancer of eye & orbit - treatable

Cataract; aphakia

Corneal ulcer; superficial injury of eye and adnexa

Glaucoma associated with disorders of the lens

Herpes zoster & herpes simplex with ophthalmic complications  
Hyphema  
Inflammation of lacrimal passages  
Open wound of eyeball and other eye structures  
Primary and open angle glaucoma with failed medical management  
Purulent endophthalmitis  
Retained intraocular foreign body  
Retinal detachment, tear and other retinal disorders  
Retinal vascular occlusion; central retinal vein occlusion  
Sympathetic uveitis and degenerative disorders and conditions of globe; sight threatening thyroid ophthalmopathy

## **EAR, NOSE, MOUTH AND THROAT**

Acute and chronic mastoiditis  
Acute otitis media  
Acute upper airway obstruction, including croup, epiglottitis and acute laryngotracheitis  
Cancer of oral cavity, pharynx, nose, ear, and larynx treatable  
Cancer of the mouth  
Choanal atresia  
Cholesteatoma  
Chronic upper airway obstruction, resulting in cor pulmonale  
Cleft palate and/or cleft lip without airway obstruction  
Deep open wound of neck, including larynx; fracture of larynx or trachea, open  
Epistaxis-not responsive to anterior packing  
Foreign body in ear&nose  
Foreign body in pharynx, larynx, trachea, bronchus and esophagus  
Fracture of face bone, orbit, jaw; injury to optic and other cranial nerves  
Leukoplakia of oral mucosa, including tongue  
Life-threatening diseases of pharynx nos, including retropharyngeal abscess  
Open wound of ear-drum  
Peritonsillar abscess  
Sialoadenitis; abscess / fistula of salivary glands

Stomatitis, cellulitis and abscess of oral soft tissue; vincent's angina

## **RESPIRATORY SYSTEM**

Bacterial, viral, fungal pneumonia

Respiratory failure, regardless of cause

Acute asthmatic attack; pneumonia due to respiratory syncytial virus in persons under age 3

Adult respiratory distress syndrome; inhalation and aspiration pneumonias

Atelectasis (collapse of lung)

Benign neoplasm of respiratory and intrathoracic organs

Cancer of lung, bronchus, pleura, trachea, mediastinum & other respiratory organs-treatable

Empyema and abscess of lung

Frank haemoptysis

Hypoplasia and dysplasia of lung

Open fracture of ribs and sternum; multiple rib fractures; flail chest

Pneumothorax and haemothorax

## **HEART AND VASCULAR**

Myocarditis; cardiomyopathy; transposition of great vessels; hypoplastic left heart syndrome

Pericarditis

Acute and subacute ischemic heart disease, including myocardial infarction and unstable angina

Acute pulmonary heart disease and pulmonary emboli

Acute rheumatic fever

Aneurysm of major artery of chest, abdomen, neck, unruptured or ruptured nos

Arterial embolism/thrombosis: abdominal aorta, thoracic aorta

Cardiac failure: acute or recent deterioration of chronic cardiac failure

Complete, corrected and other transposition of great vessels

Coronary artery anomaly

Disease and disorders of aortic valve nos

Diseases of endocardium; endocarditis

Diseases of mitral valve

Disorders of arteries: Visceral

Dissecting or ruptured aortic aneurysm  
Gangrene; severe atherosclerosis of arteries of extremities; diabetes mellitus with peripheral circulatory disease  
Giant cell arteritis, Kawasaki disease, hypersensitivity angitis  
Hereditary hemorrhagic telangiectasia  
Hypertension - acute life threatening complications and malignant hypertension; renal artery stenosis and other curable hypertension  
Injury to major blood vessels - trunk, head and neck, and upper limbs  
Injury to major blood vessels of extremities  
Life-threatening cardiac arrhythmias  
Life-threatening complications of elective cardiac and major vascular procedures  
Multiple valvular disease  
Other aneurysm of artery - peripheral  
Other correctable congenital cardiac conditions  
Patent ductus arteriosus; aortic pulmonary fistula persistent  
Phlebitis & thrombophlebitis, deep  
Rheumatic pericarditis; rheumatic myocarditis  
Rupture of papillary muscle  
Shock/hypotension-life threatening  
Tetralogy of Fallot (TOF)  
Ventricular septal defect - persistent

## **GASTRO-INTESTINAL SYSTEM**

Anal fissure; anal fistula  
Abscess of intestine  
Acquired hypertrophic pyloric stenosis and other disorders of the stomach and duodenum  
Acute diverticulitis of colon  
Acute vascular insufficiency of intestine  
Amoebiasis; typhoid  
Anal and rectal polyp  
Appendicitis  
Cancer of retroperitoneum, peritoneum, omentum & mesentery treatable  
Cancer of the gastro-intestinal tract, including oesophagus, stomach, bowel, rectum, anus, -treatable  
Congenital anomalies of upper alimentary tract - excluding tongue

Oesophageal stricture  
Esophageal varices  
Gastric or intestinal ulcers with hemorrhage or perforation  
Gastroenteritis and colitis with life-threatening haemorrhage or dehydration, regardless of cause  
Hernia with obstruction and/or gangrene; uncomplicated hernias under age 18  
Intestinal obstruction without mention of hernia; symptomatic foreign body in stomach, intestines, colon & rectum  
Paralytic ileus  
Peritoneal adhesion  
Peritonitis, regardless of cause  
Rectal prolapse  
Regional enteritis; idiopathic proctocolitis - acute exacerbations and complications only  
Rupture of intra-abdominal organ  
Thrombosed and complicated hemorrhoids

#### **LIVER, PANCREAS AND SPLEEN**

Acute necrosis of liver  
Acute pancreatitis  
Budd-chiari syndrome, and other venous embolism and thrombosis  
Calculus of bile duct with cholecystitis  
Cancer of liver, biliary system and pancreas - treatable  
Cyst and pseudocyst of pancreas  
Disorders of bile duct  
Gallstone with cholecystitis and /or jaundice  
Hepatorenal syndrome  
Liver abscess; pancreatic abscess  
Liver failure; hepatic vascular obstruction; inborn errors of liver metabolism; biliary atresia  
Portal vein thrombosis

#### **MUSCULOSKELETAL SYSTEM; TRAUMA NOS**

Abscess of bursa or tendon  
Acute osteomyelitis

Cancer of bone - treatable  
Chronic osteomyelitis  
Closed fractures / dislocations of limb bones / epiphyses excluding fingers and toes  
Congenital dislocation of hip; coxa vara & valga; congenital clubfoot  
Crush injuries of trunk, upper limbs, lower limb, including blood vessels  
Dislocations/fractures of vertebral column without spinal cord injury  
Disruptions of the achilles / quadriceps tendons  
Fracture of hip  
Injury to internal organs  
Open fracture/dislocation of bones or joints  
Pyogenic arthritis  
Traumatic amputation of limbs, hands, feet, and digits

## **SKIN AND BREAST**

Acute lymphadenitis  
Burns, greater than 10% of body surface, or more than 5% involving head, neck, hands, perineum  
Cancer of breast - treatable  
Cancer of skin, excluding malignant melanoma - treatable  
Cancer of soft tissue, including sarcomas and malignancies of the adnexa-treatable  
Cellulitis and abscesses with risk of organ or limb damage or septicemia if untreated; necrotising fasciitis  
Lethal midline granuloma  
Malignant melanoma of skin- treatable  
Non-superficial open wounds - non life-threatening  
Pyoderma; body, deep-seated fungal infections  
Toxic epidermal necrolysis and staphylococcal scalded skin syndrome; stevens-johnson syndrome

## **ENDOCRINE, METABOLIC AND NUTRITIONAL**

Acute thyroiditis  
Benign and malignant tumours of pituitary gland with/without hypersecretion syndromes  
Benign neoplasm of islets of langerhans  
Cancer of endocrine system, excluding throid-treatable

Cancer of thyroid - treatable; carcinoid syndrome  
Congenital hypothyroidism  
Disorders of adrenal secretion nos  
Disorders of parathyroid gland; benign neoplasm of parathyroid gland  
Hyper and hypothyroidism with life-threatening complications or requiring surgery  
Hypoglycemic coma; hyperglycemia; diabetic ketoacidosis  
Iron deficiency; vitamin and other nutritional deficiencies life threatening  
Life threatening congenital abnormalities of carbohydrate, lipid, protein and amino acid metabolism  
Life threatening disorders of fluid and electrolyte balance, nos

### **URINARY AND MALE GENITAL SYSTEM**

Abscess of prostate  
Acute and chronic pyelonephritis; renal & perinephric abscess  
Acute glomerulonephritis and nephrotic syndrome  
Cancer of penis and other male genital organ - treatable  
Cancer of prostate gland - treatable  
Cancer of testis - treatable  
Cancer of urinary system including kidney and bladder - treatable  
Congenital anomalies of urinary system - symptomatic and life-threatening  
End stage renal disease regardless of cause  
Hyperplasia of the prostate, with acute urinary retention or obstructive renal failure  
Obstruction of the urogenital tract, regardless of cause  
Torsion of testis  
Trauma to the urinary system including ruptured bladder  
Ureteral fistula (Intestinal)  
Vesicoureteral reflux

### **FEMALE REPRODUCTIVE SYSTEM**

Abscesses of Bartholin's gland and vulva  
Acute pelvic inflammatory disease  
Cancer of cervix - treatable

Cancer of ovary - treatable  
Cancer of uterus - treatable  
Cancer of vagina, vulva and other female genital organs nos - treatable  
Cervical and breast cancer screening  
Congenital abnormalities of the female genitalia  
Dysplasia of cervix and cervical carcinoma-in-situ; cervical condylomata  
Ectopic pregnancy  
Fistula involving female genital tract  
Hydatidiform mole; choriocarcinoma  
Infertility  
Menopausal management, anomalies of ovaries, primary and secondary amenorrhoea, female sex hormones abnormalities nos, including hirsutism  
Non-inflammatory disorders and benign neoplasms of ovary, fallopian tubes and uterus  
Sexual abuse, including rape  
Spontaneous abortion  
Torsion of ovary  
Uterine prolapse; cystocele  
Voluntary termination of pregnancy

## **PREGNANCY AND CHILDBIRTH**

Low birth weight (under 1000g) with respiratory difficulties  
Low birth weight (under 2500 grams & > 1000g) with respiratory difficulties  
Birth trauma for baby  
Congenital systemic infections affecting the newborn  
Haematological disorders of the newborn  
Necrotizing enterocolitis in newborn  
Neonatal and infant gut abnormalities and disorders, including malrotation and atresia  
Neonatal endocrine, metabolic and toxin-induced conditions  
Neurological abnormalities in the newborn  
Pregnancy  
Respiratory conditions of newborn

## HAEMATOLOGICAL, INFECTIOUS AND MISCELLANEOUS SYSTEMIC CONDITIONS

Syphilis - congenital, secondary and tertiary  
HIV-associated disease - first admission or subsequent admissions  
Imminent death regardless of diagnosis  
Acquired haemolytic anaemias  
Acute leukaemias, lymphomas  
Anaerobic infections - life threatening  
Anaphylactic shock  
Aplastic anemia; agranulocytosis; other life-threatening hereditary immune deficiencies  
Botulism  
Cholera; Rat-bite fever  
Chronic granulomatous disease  
Coagulation defects  
Cysticercosis; other systemic cestode infection  
Deep-seated (Excluding nail infections), disseminated and systemic fungal infections  
Erysipelas  
Hereditary haemolytic anaemias (eg. sickle cell); dyserythropoietic anemia (congenital)  
Herpetic encephalitis; Reye's syndrome  
Immune compromise nos and associated life-threatening infections nos  
Leprosy and other systemic mycobacterial infections, excluding tuberculosis  
Leptospirosis; spirochaetal infections nos  
Life-threatening anaemia nos  
Life-threatening conditions due to exposure to the elements, including hypo and hyperthermia; lightning strikes)  
Malaria; Trypanosomiasis; other life-threatening parasitic disease  
Metastatic infections; septicemia  
Multiple myeloma and chronic leukaemias  
Poisoning by ingestion, injection, and non-medicinal agents  
Sexually transmitted diseases with systemic involvement not elsewhere specified  
Tetanus; anthrax; Whipple's disease  
Thalasemia and other hemoglobinopathies - treatable  
Toxic effect of gases, fumes, and vapors  
Tuberculosis

Tumour of internal organ (excludes skin) : Unknown whether benign or malignant  
Whooping cough, diphtheria

## **MENTAL ILLNESS**

Abuse or dependence on psychoactive substance, including alcohol  
Acute delusional mood, anxiety, personality, perception disorders and organic mental disorder caused by drugs;  
Acute stress disorder accompanied by recent significant trauma, including physical or sexual abuse  
Alcohol withdrawal delirium; alcohol intoxication delirium  
Anorexia nervosa and bulimia nervosa  
Attempted suicide, irrespective of cause  
Brief reactive psychosis  
Delirium: amphetamine, cocaine, or other psychoactive substance  
Major affective disorders, including unipolar and bipolar depression  
Schizophrenic and paranoid delusional disorders  
Treatable dementia
